

Attorney Docket No. 103864.1101

Serial No. 09/512,734

**REMARKS**

Claims 1-72 were previously presented for consideration. **The Examiner's indication that all claims 1-72 are allowed, is noted with appreciation.**

**Objection to Reissue Declaration**

The Reissue oath/declaration filed with the application was previously objected to as being defective for failing to identify at least one error which is relied upon to support the Reissue application.

Applicant is submitting herewith a Supplemental Reissue Declaration identifying errors being relied upon to support the reissue application. In addition, a statement referring to all errors subsequent to the original declaration is also contained therein.

Unfortunately, as with the original reissue declaration, inventor Michael Mahar has again refused to execute the Supplement Reissue Declaration. Applicant is submitting herewith a Petition Under 37 CFR §1.47(a) For Submission Of Supplemental Reissue Declaration Under 37 CFR §1.175(b), together with a submission of Proof of Pertinent Facts.

Applicant therefore requests the Examiner to favorably consider the present submission of the Supplemental Reissue Declaration, and withdraw the present objection.

### CONCLUSION

Applicants respectfully submit that, as described above, the cited prior art does not show or suggest the combination of features recited in the claims. Applicants do not concede that the cited prior art shows any of the elements recited in the claims. However, Applicants have provided specific examples of elements in the claims that are clearly not present in the cited prior art.

In addition, each of the combination of limitations recited in the claims includes additional limitations not shown or suggested by the prior art. Therefore, for these reasons as well, Applicants respectfully request withdrawal of the rejection.

Further, there is no motivation shown to combine the prior art cited by the Examiner, and even if these teachings of the prior art are combined, the combination of elements of claims, when each is interpreted as a whole, is not disclosed in the Examiner's proposed combination. As the combination of elements in each of the claims is not disclosed, Applicants respectfully request that the Examiner withdraw the rejections.

Applicants strongly emphasize that one reviewing the prosecution history should not interpret any of the examples Applicants have described herein in connection with

distinguishing over the prior art as limiting to those specific features in isolation. Rather, Applicants assert that it is the combination of elements recited in each of the claims, when each claim is interpreted as a whole, which is patentable. Applicants have emphasized certain features in the claims as clearly not present in the cited references, as discussed above. However, Applicants do not concede that other features in the claims are found in the prior art. Rather, for the sake of simplicity, Applicants are providing examples of why the claims described above are distinguishable over the cited prior art.

Applicants wish to clarify for the record, if necessary, that the claims have been amended to expedite prosecution. Moreover, Applicants reserve the right to pursue the original subject matter recited in the present claims in a continuation application.

Any narrowing amendments made to the claims in the present Amendment are not to be construed as a surrender of any subject matter between the original claims and the present claims; rather merely Applicants' best attempt at providing one or more definitions of what the Applicants believe to be suitable patent protection. In addition, the present claims provide the intended scope of protection that Applicants are seeking for this application. Therefore, no estoppel should be presumed, and Applicants' claims are intended to include a scope of protection under the Doctrine of Equivalents.

Further, Applicants hereby retract any arguments and/or statements made during prosecution that were rejected by the Examiner during prosecution and/or that were unnecessary to obtain allowance, and only maintains the arguments that persuaded the Examiner with respect to the allowability of the patent claims, as one of ordinary skill would understand from a review of the prosecution history. That is, Applicants specifically retract statements that one of ordinary skill would recognize from reading the file history were not necessary, not used and/or were rejected by the Examiner in allowing the patent application.

For all the reasons advanced above, Applicants respectfully submit that the rejections have been overcome and should be withdrawn.

For all the reasons advanced above, Applicants respectfully submit that the Application is in condition for allowance, and that such action is earnestly solicited.
